Billing: Bills for water service are rendered monthly and become due and payable upon issuance following the period for which service is rendered. The utility shall compute estimated monthly bills for the first two months of a regular quarterly meter reading period and compute the bill for the third month at the regular quarterly rates for service deducting the estimated bills for the first two months. The bills will be trued up based on dollars and not on the difference between the estimated consumption and the actual quarterly reading. A late payment charge of 1 percent per month will be added to bills not paid within 20 days of issuance. This late payment charge will be applied to the total unpaid balance for utility service, including unpaid late payment charges. The late payment charge is applicable to all customers. The utility customer may be given a written notice that the bill is overdue no sooner than 20 days after the bill is issued. Unless payment or satisfactory arrangement for payment is made within the next 10 days, service may be disconnected pursuant to Wis. Adm. Code ch. PSC 185.

Combined Metering: Volumetric meter readings will be combined for billing if the utility for its own convenience places more than one meter on a single water service lateral. Multiple meters placed for the purpose of identifying water not discharged into the sanitary sewer are not considered for utility convenience and shall not be combined for billing. This requirement does not preclude the utility from combining readings when metering configurations support such an approach. Meter readings from individually metered separate service laterals shall not be combined for billing purposes.

Amendment No. 22

Public Service Commission of Wisconsin

Merrimac Municipal Water Utility

Public Fire Protection Service

The annual charge for public fire protection service to the Village of Merrimac shall be \$30,348.

The annual charge shall never be less than \$30,348. For all extensions of fire protection service, there shall be an additional charge of \$337 per net hydrant added to the system in excess of 50 hydrants.

This service shall include the use of hydrants for fire protection service only and such quantities of water as may be demanded for the purposes of extinguishing fires within the service area. This service shall also include water used for testing equipment and training personnel. For all other purposes, the metered or other rates set forth, or as may be filed with the Public Service Commission, shall apply.
